ABILITIES

STARTING ABILITY

Innate Magic: You are born with the natural ability to interact with mana. This innate talent manifests as a specific affinity with an aspect of reality. This is your domain (pyromancy, emomancy, transmutation, shadowmancy, etc.), and it describes the boundaries of your magic, within which you can shape effects.
When you want to create a magical effect, describe what you wish to achieve within your domain. The GM determines the mana cost (0–4) based on the scale and power of the manifestation.
Your domain:_____

EXPERTISE

- **Expertise:** Choose a special ability from another source. How did you learn it? _____
- **Expertise:** Choose a special ability from another source. How did you learn it? _____
- **Expertise:** Choose a special ability from another source. How did you learn it? _____

SPECIAL ABILITIES

- **Multi-domain:** You can choose another domain. [NE]
  Your second domain:_____
- **Overchannel:** You can PUSH YOURSELF to generate a magical effect with INNATE MAGIC using your stamina instead of your mana. You spend stamina equal to 2 + the magical effect's mana cost. [NE]
- **Innate magical resistance:** You can spend 1 mana to add +1d to a RESISTENCE ROLL. [NE]
- **Trained prodigy:** When you roll a failure while casting a spell, you may expend your special armor to change spell and treat the result as a partial success.
- **Natural affinity:** When you roll ATTUNE, take +1 to the roll result. [NE]
- **Mana reserve:** You body can hold more mana than the avarage. You gain 1 extra mana to spend. ▯
- **Metamagic:** When you witness a magical effect being created, you may expend your special armor to interfere with it. Doing so, you bend it to your domain. Describe how your domain alters its manifestation. [NE]
- **Magical being:** You let out a magical aura, causing magical beings to treat you as one of their own.
- **Arcane resonance:** Magical objects resonate with you. You may expend your special armor to resist a consequence from a magical object.
- **Arcane mutation:** Your power has swelled beyond its former limits, pressing against the fragile boundaries of your flesh. Something within you has changed. The surge has carved its mark into your body, reshaping it in ways that cannot be undone. Perhaps, your eyes now burn with a cold inner light, revealing the hidden weave of mana beneath the world's surface. Or perhaps the nails of your right hand have thickened and lengthened into pale, enchanted talons. [NE]
  Describe this altered part of your body: _____
