The Artificer

NAME _____ **PARTY** _____

BACKGROUND _____ **SPECIE** _____

DRIVE _____ **LOOK** _____

stamina **Mana** **burnout**

BURNOUT CONDITIONS: COLD — HAUNTED — OBSESSED — PARANOID — EXHAUSTION — UNSTABLE

harm		
4		PERMANENT
3		NEED HELP
2		-1D
1		LESS EFFECT

healing
project clock

armor uses
- ARMOR ☐
- HEAVY ☐
- SPECIAL ☐
- SHIELD ☐

GAIN XP

Every time you roll a desperate action, mark xp in that action's attribute. At the end of each session, for each item below, mark 1 xp (in your playbook or an attribute) or 2 xp if that item occurred multiple times.

- You addressed a challenge with **TINKER** or **STUDY.**
- You expressed your beliefs, drives or background

ITEMS

- Ink and pen
- A schematic for _____
- A clock
- An hammer
- Maker's tools
- A Lantern
- Some sheets of paper
- _____
- _____
- _____
- _____
- _____

Load: Light (3) Medium (5) Heavy (6)

STASH _____ **COINS** _____

PLAYBOOK

INSIGHT
- HUNT
- STUDY
- SURVEY
- TINKER

PROWESS
- FINESSE
- PROWL
- SKIRMISH
- WRECK

RESOLVE
- ATTUNE
- COMMAND
- CONSORT
- SWAY

PUSH YOURSELF

+ **Spend 2 stamina to add +1d or +1 effect level to your next action roll.**

CONTACTS

- _____ the mechanic
- _____ the poisoner
- _____, your ex-professor
- _____, an old client
- _____
- _____

Describe your deadly friend

Describe your deadly friend

ABILITIES

STARTING ABILITY

Expert engineer: You are an expert in construction and hybridization. If you have the schematics and the necessary components for your project, the final product is always exceptionally well-made. If you lack the schematics, you have to rely on your own creativity. When doing so, take +1 to the roll result.

EXPERTISE

- **Expertise:** Choose a special ability from another source. How did you learn it? _____
- **Expertise:** Choose a special ability from another source. How did you learn it? _____
- **Expertise:** Choose a special ability from another source. How did you learn it? _____

SPECIAL ABILITIES

- **Alchemist:** You have learned the effects of different elements when mixed. When you try to create an alchemical mixture, take +1 effect level. [NE]
- **Consequence of science:** Thanks to your alchemical experiments, you have become immune to the poisonous effects of a substance. You are immune to: _____
- **Mechanic:** When you try to build a mechanism, take +1d. [NE]
- **Eye for flaws:** Thanks to your experience, you naturally spot the flaws in complex designs. When you attempt to disable, sabotage, or break a mechanism or artifact once you figure out how it works, take +1d or +1 effect level.
- **Magical-powered:** You have learned to combine rudiments of magic with your engineering creations. When you try to create something, you may spend 2 mana to give it a simple magical feature, such as powering it with mana or making it resistant to corrosion or rust. The object is not considered magical or enchanted, and the mana flows through a single point used as a catalyst. [NE]
- **Crafter knowledge:** When you are gathering information about a mechanism, an artifact or a building, take +1d.
- **Living forge:** You can PUSH YOURSELF to repair something using makeshift material.
- **Lucky approximation:** When you fail a TINKER roll, you may expend your special armor to treat the result as a partial success.
- **Determinated:** You may expend your special armor to resist a consequence of fatigue, weakness, or chemical effects.
- **More hands:** When you LEAD A GROUP ACTION that involves the use of complex mechanisms or chained action, allies take +1d.
